DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/7/2009 has been entered.

Response to Amendment

The Declarations filed on 8/7/2009 under 37 CFR 1.131 are sufficient to overcome the Liu reference.

Response to Arguments

Applicant's arguments with respect to claims 1-8, 19, and 20 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 and 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Number 5,987,611 to Freund et al. in view of U.S. Patent Number 5,801,747 to Bedard and in further view of U.S. Patent Number 6,486,892 to Stern.

As to claim 1, Freund teaches a method of controlling user access to Internet sites, comprising: determining an Internet site that a user is accessing; providing a timer; incrementing said timer with time spent accessing Internet site by said user and blocking said user from accessing the Internet site when said timer reaches a predetermined level (Figure 7A and col. 9, line 64-col. 10, line 43); however Freund does not explicitly teach limiting based on a content category of Internet sites. Freund does suggest that it may be beneficial to limit the access to certain types of content (col. 9, lines 38-41).

Bedard teaches a method of monitoring including a profile that can be used to control the amount of time that information can be accessed for a particular category of content (col. 7, line 65-col. 8, line 6, in this case television).

It would have been obvious to one of ordinary skill in the Computer Networking art at the time of the invention to combine the teachings of Freund regarding limiting the amount of time a use can spend on an internet site with the teachings of Bedard regarding monitoring time access to content categories because content categories would allow a user of Freund's system to more broadly characterize rules instead of having to type each website in manually as shown in Figure 7A of Freund. Also, Stern shows the use of the same profile and rules for managing both internet content and television content (such as that explicitly monitored in Bedard) and how the teachings from either type of content can apply to one another, especially in the context of the applicant's broadly claimed invention (See Summary and corresponding disclosure in Stern).

As to claims 2 and 3, Freund allows a user to pick any arbitrary amount of time (Figure 7A).

As to claims 4 and 5, Freund shows that the time limit can be in effect for one day (Figure 7A).

As to claim 6, a second rule can be plugged into Figure 7A of Freund for a second content category.

As to claim 7, Freund teaches logging activities (col. 9, lines 17-19).

As to claim 8, Freund does not state that the Freund invention applies to cached webpages. Therefore a user of the Freund-Bedard-Stern combination would not be restricted from cached web pages as is conventionally known.

As to claims 19 and 20, they are directed towards a system for implementing the method of claims 1 and 8 and are therefore rejected for the same reasoning as claims 1 and 8.
